

ZDHC

How collective action is transforming an industry

Introduction

November 2024, Claudia Haverman

14 years ago...

Detoxing the fashion industry

From a small group of 6 founding members to a big global collaboration.

Key to industry transformation & Scale:

- Transparency
- Collaboration
- Commitment

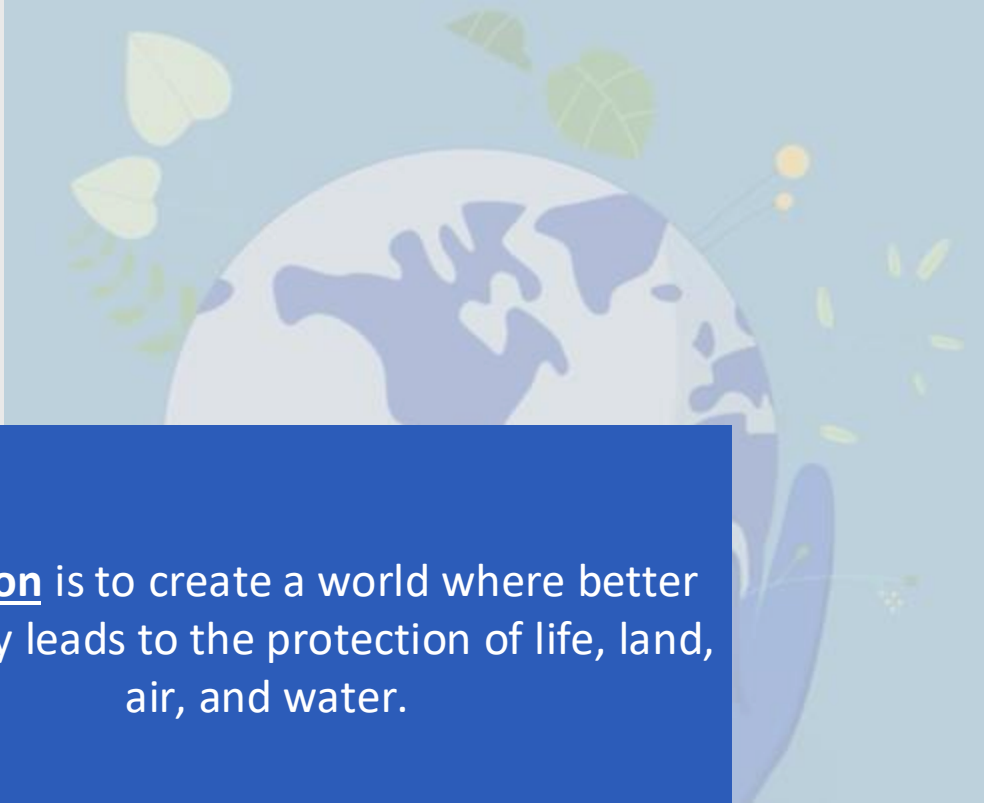

and perseverance

ZDHC Foundation

The Roadmap to Zero Programme, by ZDHC, leads the fashion industry to eliminate harmful chemicals from its global supply chain by building the foundation for more sustainable manufacturing to protect workers, consumers and our planet's ecosystems.

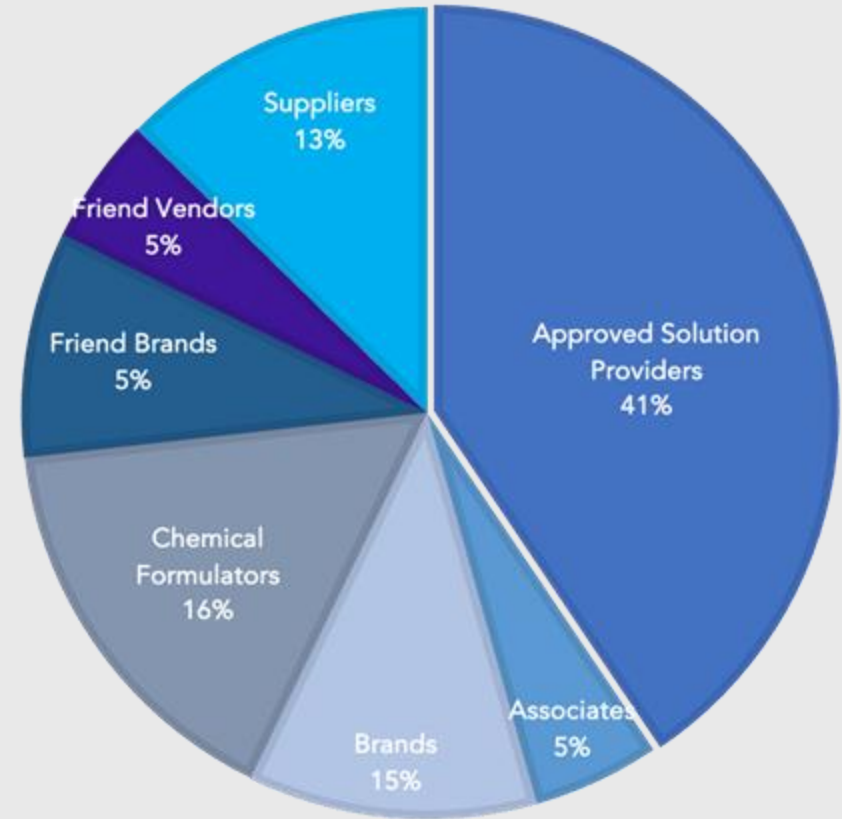

Our Vision is to create a world where better chemistry leads to the protection of life, land, air, and water.

Our Mission is to lead our global value chains to achieve the highest standards for sustainable chemical management, driving resource efficiency and circularity.

Today, our Committed
Community has a total of...

ZDHC LEADERS TO ZERO PROGRAMMES

BRANDS TO ZERO

Brands to Zero is our leader programme for brands. Each year, they are assessed on their progress in implementing ZDHC guidelines, according to a set of key performance indicators. To ensure a fair and neutral assessment process, we mandate KPMG to carry out the Brands to Zero evaluations based on qualitative and quantitative data.

SUPPLIER TO ZERO

Launched in June 2020, Supplier to Zero is our leader programme designed to align and speed up supply chain implementation of ZDHC guidelines and solutions. It helps us to closely monitor the Roadmap to Zero performance on the ground, at factory level, a vital expansion of ZDHC's reach and ability to effect long-term change.

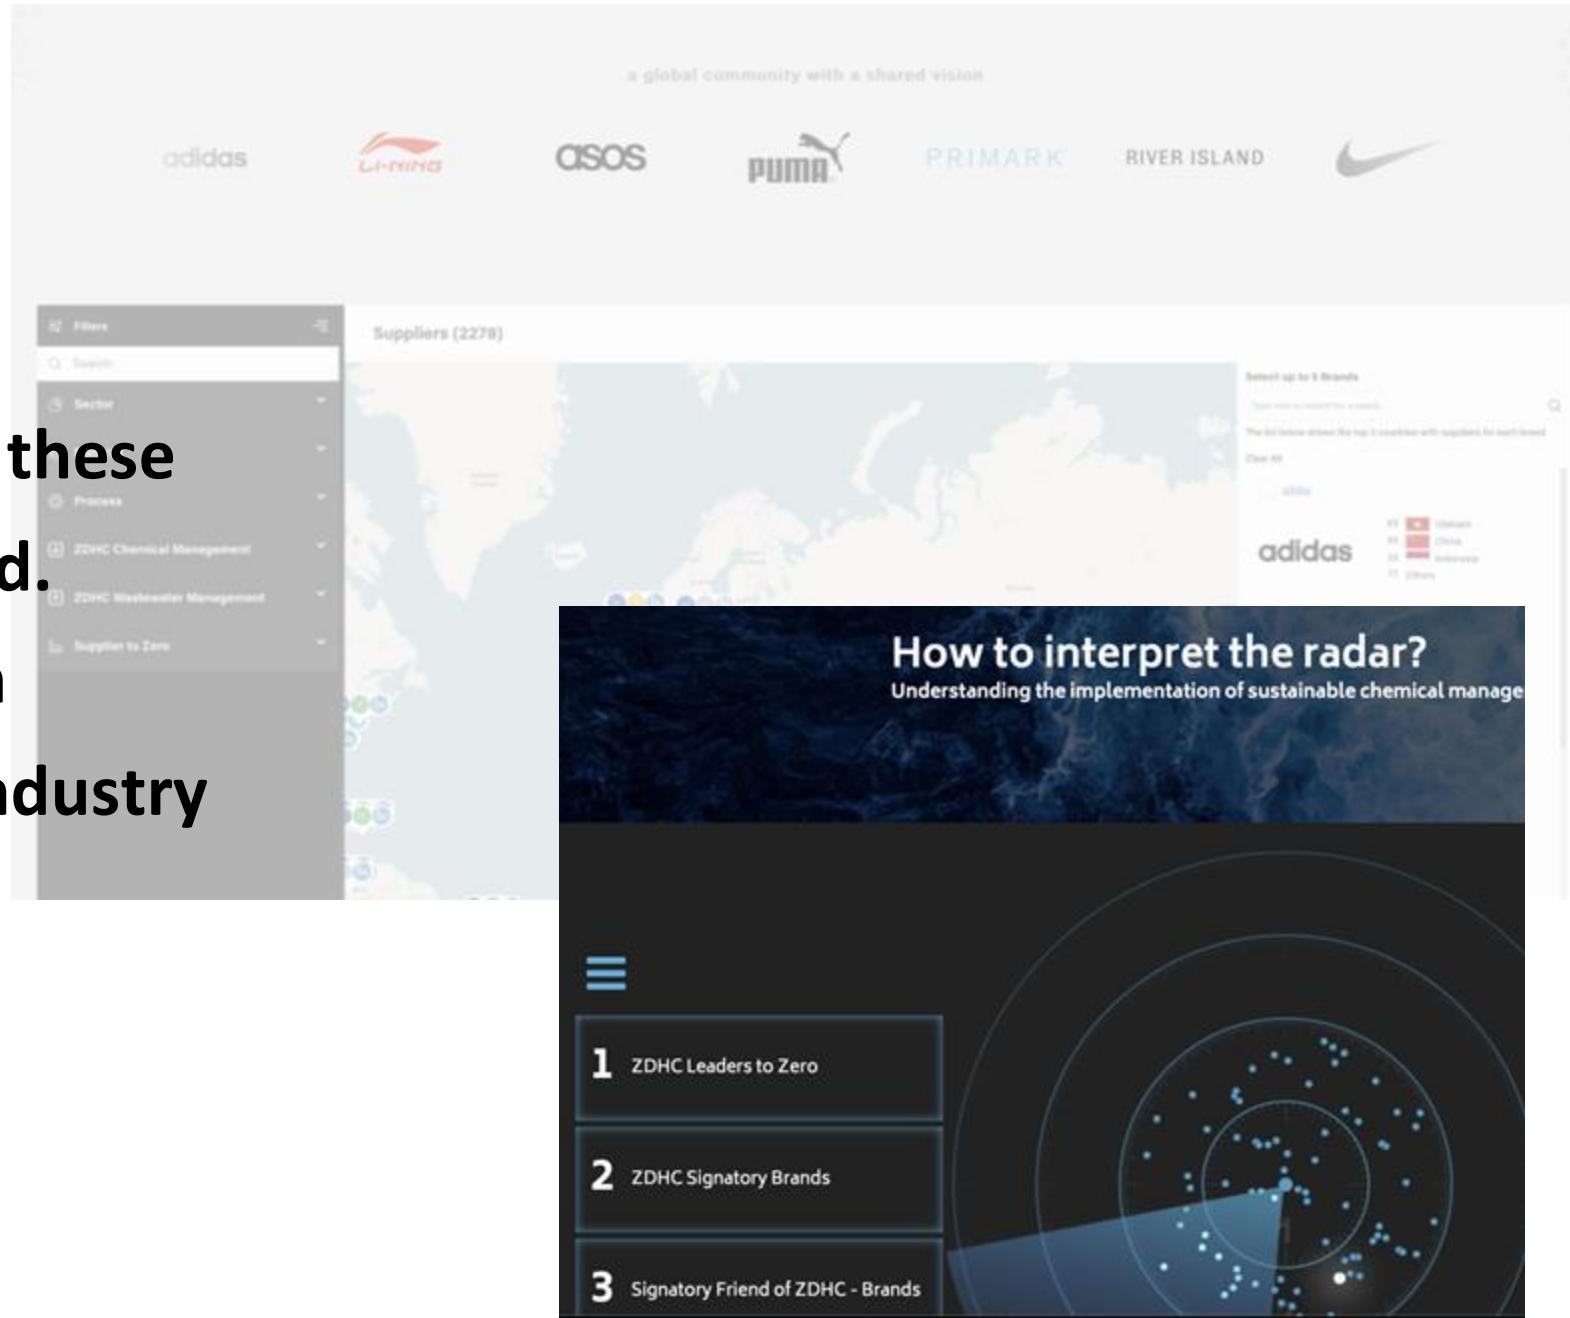

FORMULATION TO ZERO

Still to be launched, our third leader programme is specifically aimed at chemical suppliers. The programme will enable the holistic evaluation of chemical formulations for sustainability attributes for manufacturers and brands to make informed choices that lead to using more sustainable chemistries.

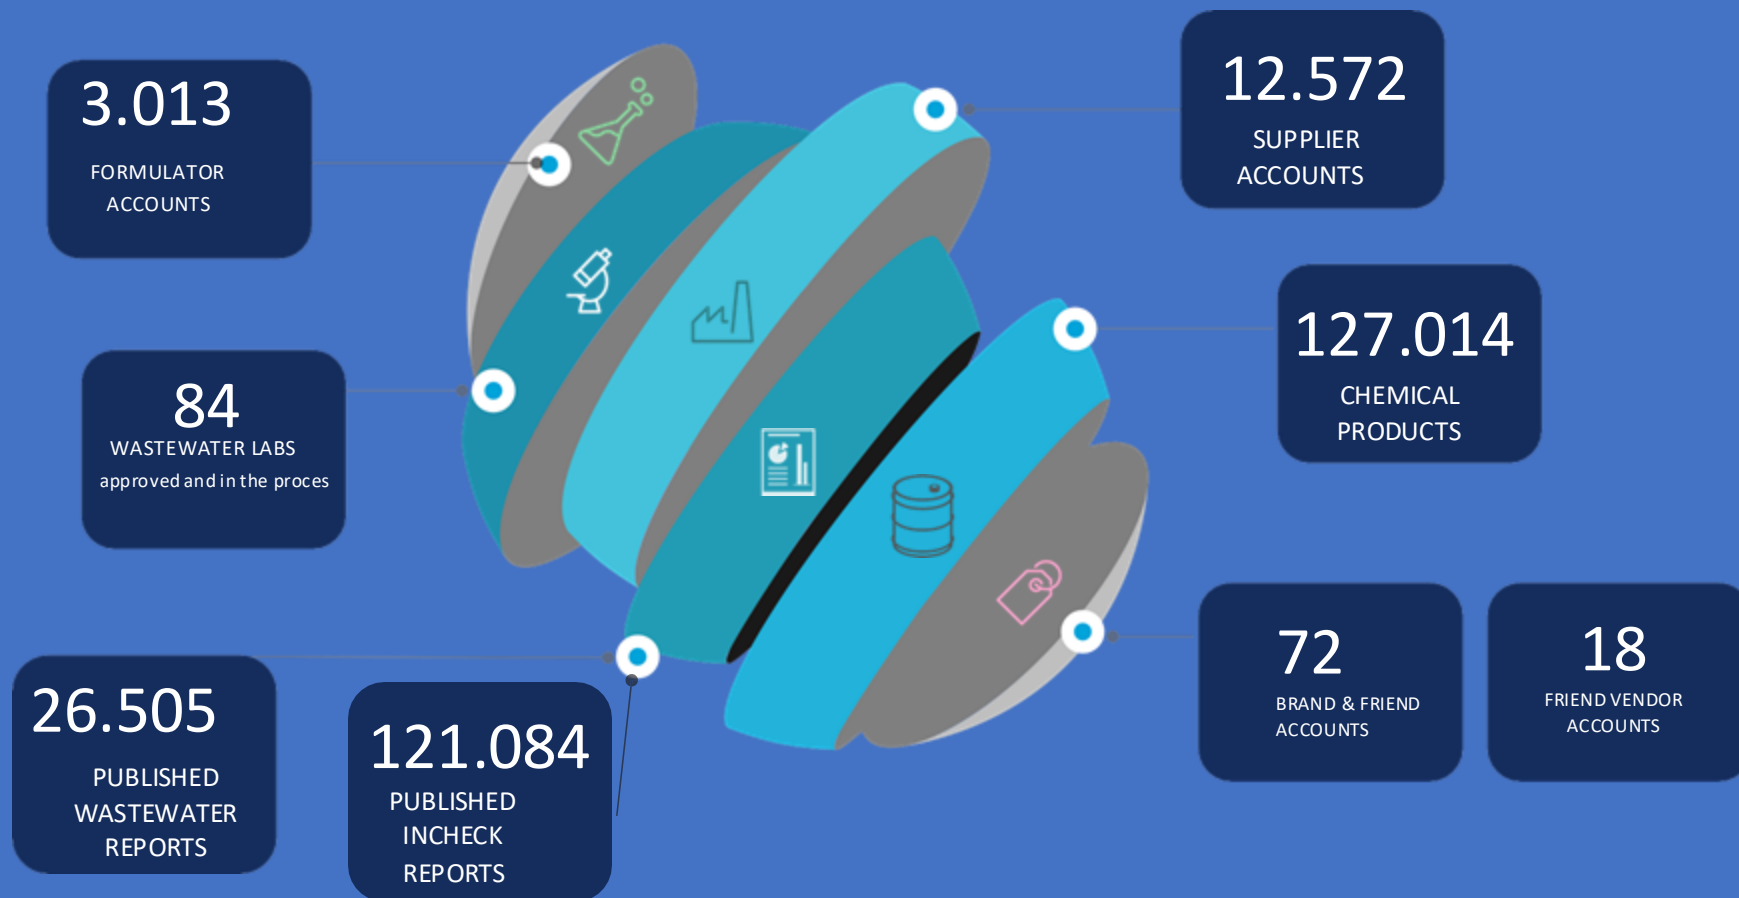

That is a lot.....

All is interconnected

That is a lot, correct. But all these elements are interconnected. Therefore we work on them collectively. Backed up by industry data, keeping stakeholders accountable and sharing information online via our detox.live platform
